TheBEND

"The EBe servo-electric bender is one of the most amazing machines we have ever seen. It has allowed us to manufacture parts that our vendors couldn't...and it allowed us to manufacture them in a higher degree of accuracy at amazing speeds. Parts that would take 10-15 minutes by hand, with possibly two people, the EBe does in under a minute...and it does it better. Check out this equipment. It can literally change your company and change your future, the way it has for Wood Stone."

Keith R. Carpenter
President
Wood Stone Corp.
Bellingham, WA

Prima Finn-Power is a leader in advanced bending and innovative "green" technology. Our servo-electric brakes and fully-automatic benders provide superior performance and numerous benefits for our customers, including:

- Higher productivity
- Increased precision
- Enhanced flexibility
- Reduced maintenance
- Increased uptime
- Dramatically lower energy consumption (~50%)
- Higher profits

Contact us today to learn how Prima Finn-Power can provide a profitable solution to any sheet metal bending application.
